SCOTTISH BIRDS - BINDING

Arrangements have been made for binding Volume 2 of "Scottish Birds." The charge is 16/10d for binding in red buckram, or 20/5d for binding in red quarter leather, both prices including return postage. The parts to be bound (Nos. 1 to 8, Tentsmuir Supplement, and Index) should be sent direct to the binders together **with your remittance to cover the cost of binding.** Back numbers may be purchased from the Scottish Centre for Ornithology and Bird Protection, 21 Regent Terrace, Edinburgh 7, at 5/- each, but **not** from the binders. **Please be sure to complete the binding form on the back cover** (with details of your name and address, remittance, and style of binding required) before sending the parts to:

I N D E X

The index is in three parts. The first is a general index to the various sections of the journal; the second is a list of all papers and short articles; and the third is an index of all significant mentions of each species. English names are used throughout, but a key to scientific names is given at the end. Only the first page of each reference is given, except in the index of papers and short articles.

The index to species is selective, not comprehensive. Titles of papers and short notes dealing with particular species are included in abbreviated form, and some other sub-headings are added; otherwise only page numbers are given. All references have been indexed from short and current notes, reviews of changes in status, local status lists, and lists of unusual occurrences. Since most contributions are concerned with migration and distribution of birds in Scotland it may generally be assumed that where no further details of the references listed under particular species are given they are in this category. Passing and comparative references have usually been omitted, and also references within the body of papers, reviews, obituaries and other contributions, unless these are status reports or considered of special interest apart from the context in which they are mentioned. In particular it should be emphasised that detailed and valuable information on migration and numbers of common birds, in papers such as the Isle of May reports, finds no place in the index to species.

SCIENTIFIC NAMES OF SPECIES INCLUDED IN INDEX

Species not mentioned in the index are not included here. Except for the order of species within certain genera, scientific nomenclature follows the 1952 B.O.U. Check-List of the Birds of Great Britain and Ireland with the changes recommended in 1956 by the Taxonomic Sub-Committee (*Ibis* 98: 158-168), and the 1957 decisions of the International Commission on Zoological Nomenclature (*Ibis* 99: 569). English names follow *The Handbook of British Birds* with the alterations proposed in *British Birds* in January 1953 (46: 2-3) and January 1956 (49: 5).
